

Study Area Map — Paired Intertidal Sites

SUPPORTING DOCUMENTATION · PERMIT 26-635-017

Two paired rocky-intertidal collection sites along the North Coast Redwoods District shoreline. Baker Beach is a highly accessible, visitor-impacted shore; False Klamath Cove is a comparable low-impact shore ~15 mi from the nearest town. Field work remains outside the False Klamath Cove State Marine Reserve boundary at all times.

Site coordinates

Site	Coordinates	Access & notes
Baker Beach	41.049, -124.128	Day-use lot; intertidal impacted by purple urchin and heavy visitor use.
False Klamath Cove	41.603, -124.102	Remote; collection stays outside the marine reserve boundary.

Schematic — not to scale. Full coordinates supplied to the district ranger prior to each visit.
